IT'S PRETTY QUIET AT THE ARTS CENTRE RIGHT NOW. USE YOUR CREATIVE SKILLS AND BRING THE RUTHERFORD'S DEN LECTURE THEATRE AND ALL THESE QUIRKY NZ NATIVE BIRDS TO LIFE WITH COLOUR.

FUN FACT

When Ernest Rutherford was a student at Canterbury College, a diagram of an atom had no nucleus because he hadn't proven it was there yet. By proving the existence of a nucleus he changed our world. His discoveries helped allow for the creation of modern-day technology like cell phones and internet. So thanks to Ernest, we are lucky to have this technology to connect with each other while we stay at home this month!
